

# API Toolbox: Asset Management

Smarter asset control for inspections.

The Asset Management Database (AMDB) within the API Toolbox gives your team instant visibility into every asset—without the complexity of bloated enterprise systems. Designed for inspection companies and operators who need to move fast, stay compliant, and eliminate rework, AMDB centralizes your asset intelligence in one powerful, easy-to-use platform.

No more juggling spreadsheets, no more wasted time on redundant manual entry. With AMDB, you configure once, use everywhere – empowering your organization to collaborate faster and safer.

## WHY THE AMDB OUTPERFORMS THE COMPETITION

- **No long onboarding cycles** – Start using AMDB in hours, not months
- **Purpose-built for API inspections** – Preloaded with 510/570/653 support
- **No IT army required** – Easily managed by inspectors, not software admins
- **Designed for agility** – Ideal for small and midstream teams, not just mega-refineries

## CORE BENEFITS

- **One Source of Truth** – Securely store static and inspection-based data for tanks, vessels, and piping in a centralized system that updates across all your reports and tools
- **Report Ready, Always** – Prepopulate inspection templates with verified asset data—no more hunting through spreadsheets or retyping specs
- **Built-In Compliance** – Support TVC documentation standards and align with PHMSA, API 510, 570, and 653 with auditable, traceable records
- **Field to Report, Seamless** – Link with the API Collector App and APITB to ensure field observations sync directly with asset records and final reports
- **Live Updates with Zero Lag** – Modify asset info once and watch it cascade across your system. Your team stays aligned—no matter where they work

## KEY FEATURES

### **Dynamic Asset Profiles**

Centralize static and dynamic asset information – including inspection histories, material specs, and operational conditions.

### **Real-Time Updates**

Modify an asset record once and update every connected report instantly.

### **Audit-Ready Recordkeeping**

Meet regulatory requirements with consistent documentation standards across the organization.

### **Hierarchy-Driven Organization**

Categorize assets intuitively with flexible hierarchy structures for easier search and reporting.

### **Secure, Cloud-Based Access**

Keep your team aligned, no matter where they are.

## SEE THE DIFFERENCE

Unlike competitors, AMDB is made for teams who can't afford to wait for IT to catch up. It's built for the work you do now—and ready for the pressure of audits tomorrow.

Let's put your asset data to work. Talk to us about how AMDB can simplify your inspections and power your pipeline integrity.

## ABOUT TECHNICAL TOOLBOXES

Technical Toolboxes is the global leader of integrity analytics for pipelines to help solve the growing, complex challenges they face across crossings, corrosion, welding, and more. Our modern software platform provides a simple way to get the most accurate pipeline engineering calculations so that you can increase team productivity and improve compliance while decreasing risk. We enable energy companies to move away from rudimentary calculations and processes to a world of fast, secure, scalable pipeline insights you can trust.
