

The API Collector streamlines data collection with offline capabilities, boosting efficiency and saving time. This automated tool ensures accurate reporting for API 653, 510, and 570 inspections, all within an easy-to-use interface.

1 SELECT YOUR REPORT TYPE

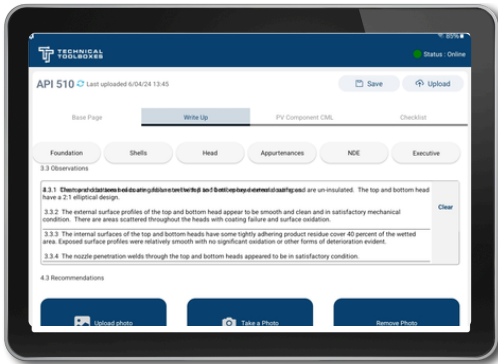

- Users can create a 'New Report' and choose from 3 different inspection types: 653, 510, or 570

2 CREATE YOUR REPORT

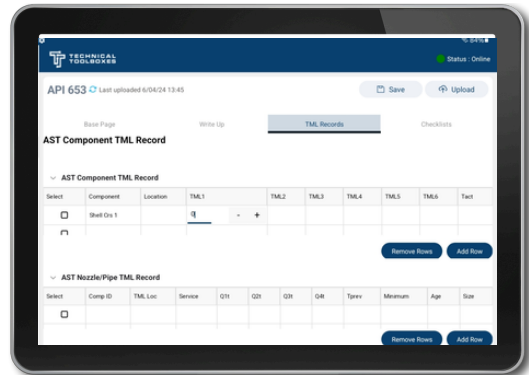

- Fill out the base page with client data, tank data, thickness readings, etc.

3 ANNOTATE YOUR WRITE UP

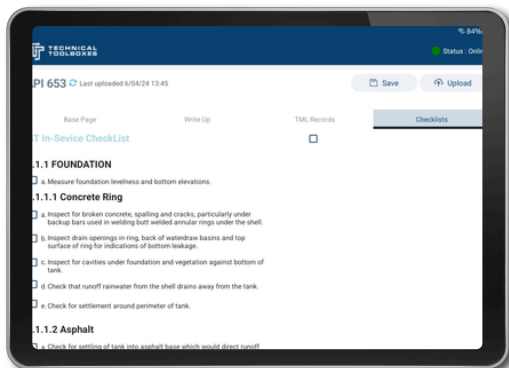

- Choose between using pre-filled templates or completely customize each section
- Capture and upload photos to each section

4 CREATE TML RECORDS

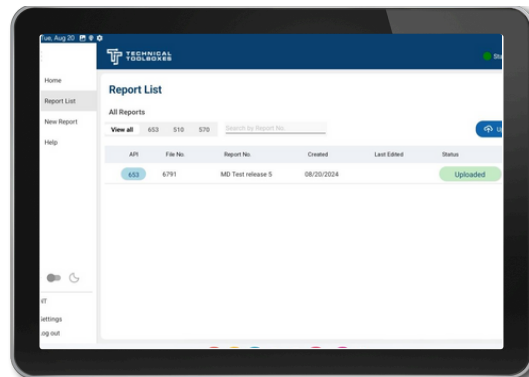

- Add components and nozzles without limits to ensure comprehensive TML records

5 VALIDATE THE CHECKLIST

- Review the checklist to ensure all sections are completed accurately before final submission and save your report

6 UPLOAD REPORT TO THE HUB

- When you're ready, make sure you're connected to the internet and upload your report straight to the HUB!
